How risky is it?

The value of the Fund can go down as well as up. You could lose money.

In assessing the risk level of a fund, most fund managers use a methodology based on volatility which looks at how much a fund's returns change over time. However, for this Fund, Bullion Management Services Inc. identifies the risk level based primarily on qualitative factors (e.g., negative correlation to other asset classes, effective hedge vs inflation and value of US dollar, preservation of purchasing power and intrinsic value) and Bullion Management Services Inc.'s views on the fundamentals of gold, silver and platinum, and the role of precious metals as a wealth protection strategy.

The risk rating of this Fund may not be comparable to other mutual funds that use a methodology based on volatility of fund returns.

For a description of the risk classification methodology that Bullion Management Services Inc. uses to rate the risk level of the Fund, see the "Fund Risk Classification" section of the simplified prospectus.

Risk rating

Bullion Management Services Inc. has rated the risk rating of the Fund as **medium**.

This rating is based on qualitative factors and Bullion Management Services Inc.'s views on the fundamentals of gold, silver and platinum and the role of precious metals as a wealth protection strategy. It doesn't tell you what the risk rating of the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the Risks of Investing in a Mutual Fund?" section of the Fund's simplified prospectus.

A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Class A units of the Fund. The fees and expenses – including any commissions – can vary among classes of the Fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

Bullion Management Services Inc. pays the trailing commission to your representative's firm. It is paid from the Fund's management fee and is based on the value of your investment. The rate depends on the sales charge option you choose.

Front-end sales charge	A representative may receive an annual trailing commission of up to 1% of the value of your investment each year. This equals up to \$10 each year for every \$1,000 invested.
