The Millennium BullionFund Reports Five-Year Performance Results

Toronto, ON – May 8, 2008 – Bullion Marketing Services Inc, distributor of The Millennium BullionFund, today reported impressive five-year returns for their Class A units. For the five-year period ending March 5, 2007, the Fund generated an average annual compounded rate of return of 6.9 per cent in Canadian dollars and 15.5 per cent in U.S. dollars.

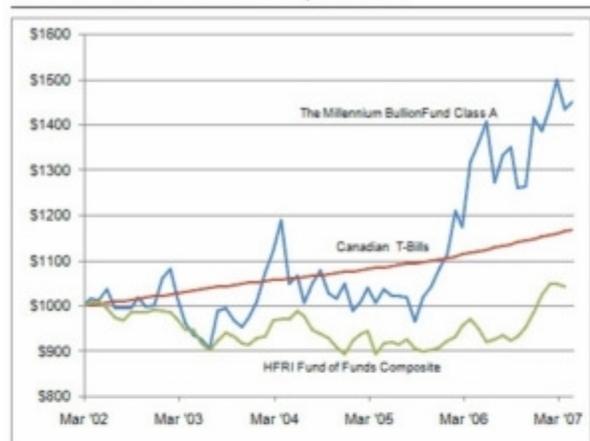

In addition to its five-year performance history, The Millennium BullionFund achieved another important milestone by surpassing \$100 million Cdn in assets in February, 2007.

Three-year returns to March 5, 2007 were 7.5 per cent Canadian and 11.5 per cent U.S., while one-year returns were 13.4 per cent Canadian and 11.2 per cent U.S.

“The disparity between the Canadian and U.S. rates of return are based around the strengthening Canadian dollar relative to the U.S. dollar,” said Nick Barisheff, President of Bullion Marketing Services Inc. “However, the real bull market in precious metals began in August 2005, and prices started to rise in all currencies. Until then, it was more of a U.S. dollar bear market rather than a global precious metals bull market. Consequently, the differential between Canadian and U.S. dollar performance has narrowed. From August 1, 2005 to March 5, 2007 the Fund generated a 37 per cent gain in Canadian dollars, and a 42 per cent gain in U.S. dollars.”

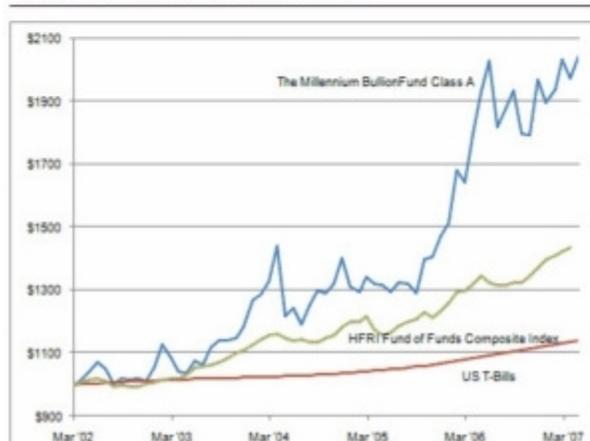

“As the bull market in gold, silver and platinum progresses, more and more investors and financial advisors are realizing the importance of including precious metals as part of every portfolio. The progress of the precious metals bull market is confirmed by the fact that The Millennium BullionFund reported its highest annual rate of return in 2006, its fifth calendar year, boasting a 24.5 per cent Canadian dollar and 25.0 per cent U.S. dollar return.”
